Cruising at Altitude: Advanced Reporting in Xero (Interactive) — Report Engine, Packs & Syft in Practice

Craig McWilliam

Once you have the day-to-day under control, it’s time to climb to cruising altitude and look at the bigger picture. This interactive "deep dive" is designed for Business Managers who want to master the art of storytelling through numbers.

We will open up the engine room of Xero’s Advanced Reporting features, teaching you how to build custom Report Packs that Boards of Trustees actually want to read. We will also demonstrate Syft in practice to visualize your data.

Note: This is an interactive session. Please bring your laptop to follow along as we build reports in real-time.
