**Cyclical Maintenance 201: Planning with the Winds of Change**

Joanne understands that for many Business Managers, the 10-Year Property Plan and financial statements don't always align. With experience in school finance since 2013, along with her role as a reporting specialist at Accounting for Schools, she brings a well-rounded perspective on property finance from all angles.

In this workshop, Joanne will simplify the complexities of Cyclical Maintenance provisions and unpack the nuances of managing Capital Works and 5YA projects. She'll also explore how schools can strategically leverage Ministry-led initiatives to strengthen their own maintenance planning.

Focused on practical, real-world application, Joanne will share clear strategies to help schools navigate requirements with confidence—making the process more manageable for teams and more transparent for auditors.
