Riding the Jetstream - Setting up and maximising online enrolments - KAMAR Masterclass

Mark Fidler

Still using paper enrolment forms and entering them manually? KAMAR's online enrolment removes all the paperwork and double handling. With functionality for 1 or 2 stage enrolments you can customise forms for zoned or unzoned schools, digitally sign agreements and save relevant documentation straight into their KAMAR record. We'll take a look at the whole process, options available for different school types and how the enrolments forms are customised.
